

Prime Resins, Inc.
Polyurethane Grouts:
The Solution for Leaks

- Fills voids and stabilizes soil
- Stays flexible for years
- Cost effective and quick
- Permanently seals leaks
- Forms waterproof curtain around outside of structure

Gamka Sales Company, Inc.
983 New Durham Road
Edison, NJ 08817

STOP WASTING YOUR BUDGET!

Are you paying fines to the EPA? Are you faced with a sewer connection moratorium? Does your staff get nervous watching the weather forecast?

Fix those leaks and put money back into your budget!

Gain back treatment plant capacity while reducing construction costs for additional pretreatment storage due to groundwater infiltration.

Cracks, improperly installed or failed joint seals, settling and misalignment can all create entry points for groundwater infiltration, reducing valuable system capacity. As groundwater leaks in, it also carries away soil particles. This creates a series of voids around the pipe or structure, eventually leading to sinkholes. These soil particles also increase maintenance budgets with the accrual of the costs associated with cleaning lines, offsetting wear and tear on pipelines, and replacing pumping equipment.

Prime-Flex Grouts are used to stop this unwanted groundwater infiltration and fill these soil voids. This prevents sinkholes, restoring valuable system capacity while reducing or preventing EPA fines for surcharge or bypass pumping.

Cost-effective

Start saving money from Day One with grouting — the first step in any successful Infiltration and Inflow (I&I) reduction program (even if installing liners).

Problem:
Voids and
gushing leaks

Solution:
Prime-Flex 910
Prime-Flex 920

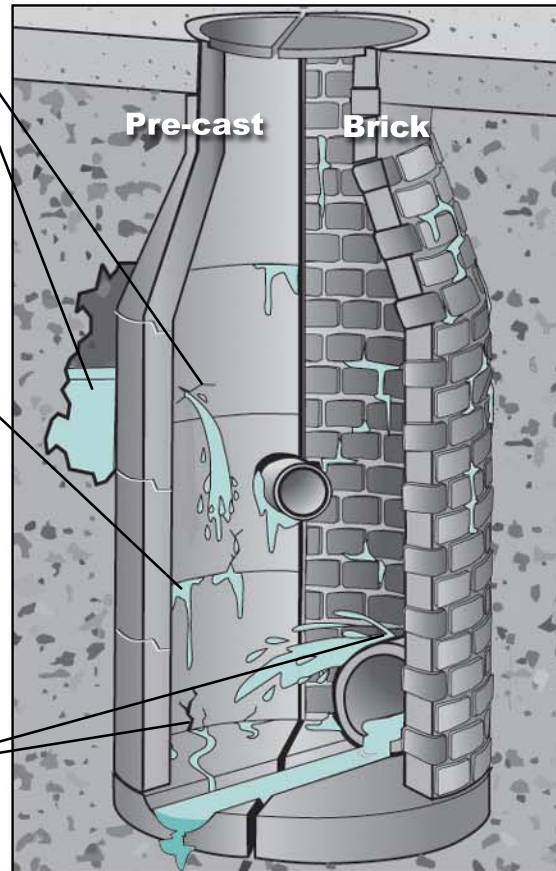

Problem:
Leaking joints

Solution:
Prime-Flex
900LVSF*
or
Prime-Flex
900XLV*

Problem:
Leaks at base
and pipe joints

Solution:
Prime-Flex
Hydro Gel SX*

**Prime-Flex polyurethane grouts
are designed for manhole, sewer
pipe, and lateral grouting.**

Prime-Flex Polyurethane Grouts Usages:

- Manholes
- Utility Vaults
- Meter Boxes
- Tunnels
- Storm Water
- Tanks
- Clarifiers
- Aeration Basins
- Lift Stations
- Pump Stations
- Catch Basins
- Elevators Pits
- Below Grade Walls
- Equipment Pits
- Lateral Connections
- Mainline Grouting
- Dams (earthen or concrete)
- Channels / Flumes
- Swimming Pools
- Concrete Basements

**Reclaim Vital System Capacity with
Prime-Flex Polyurethane Grouts**
