**Gamka Sales Co.
now has the UNI-PLY
Modular Hand Set
Panel
Concrete Forming
System!**

1000 PSF System

All panels are powder coated. In doing so the paint is baked into the panel which allows for a long form-life and easy concrete clean-up.

Exact corner joints eliminate tolerance build-up over large areas.

"Let's form it together!"

Angle struts are spaced on 12" centers to provide strength, uniform concrete and minimize deflection.

1/2" plywood is riveted to angle struts. Plywood tolerance is closely maintained to assure long form life.

Side and end rails are rolled from 55,000 p.s.i. steel and welded continuously at corners for maximum strength.

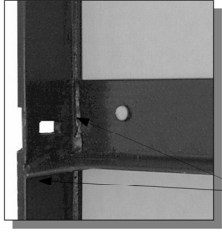

Handles are provided on panels for easy handling in setting and stripping forms

Rear, side and end rail dados are located at 6" on center to allow optimum accessory location.

Uni-Ply now comes STANDARD with 9 ply, 1/2", 220/220 Heavy Duty Premium birch plywood faces for many hundreds of re-uses! Flip over to reface form.

* Front and rear rail contact points prevent grout seepage and permit true form alignment with adjacent panels.

2" wide angle strut allows for more weld for added strength.

Uni-Ply Handset Panel System by Universal Form Clamp Co.:

- Highest Quality Handset System in the Industry... Guaranteed!
- For Handset or ganged forms along transition walls, cut-up walls, ramps, abutments or pilasters.
- Simple assembly, light weight, fast erection and easy removal.
- Multiple reuses.
- Seven heights from 3' to 10'.
- Widths from 1" to 24".
- 80 standard filler sizes offered, custom heights available.
- Superior materials and manufacturing: MADE IN THE USA.
- Powder-coated, not hand sprayed, for easy clean-up and coating.
- Optional custom company color painting match.
- Engineering services on request.

Form Release Agents, Form Ties, Wedge Bolts, Vibrators in Stock.
