

Application engineering:  
It's what we do.

### SOLUTIONS BY GAMKA

*Gamka is your central resource. Do you have a complicated issue? Call us for Application Engineering, we have solutions for you. In our 60,000 sq. ft. building, Gamka houses a very experienced staff, 30,000 plus stock inventory items, 1,400 pieces of job proven rental equipment, expert mechanics with 9,000 parts for equipment and engines in house. We do early deliveries using our own trucks and drivers. Gamka has been a Full Service Construction Equipment and Supplies Provider since 1986, and is family owned and operated, not a chain.*

#### Stormwater Management Center

Visitors are welcome at 983 New Durham Road, in Edison, NJ. Come to our 2,000 sq. ft. showroom and learn what Gamka is all about, meet the people, see for yourself how we can solve construction problems for you.

# Beyond hay bales, beyond silt fence... WAY beyond!

Sizes to fit all applications!

## Sediment Control:

Building sites, stormwater management and the health of the ecosystem are now intrinsically entwined. "Construction site discharges were a source of pollution in 6% of impaired rivers, 11% of impaired lakes, ponds and reservoirs, and 11% of impaired estuaries." EPA 305(b) report, 1996.

The Environmental Protection Agency has the authority, power and responsibility to empower their mission of improving the ecostructure. Stringent rules to control stormwater runoff are in place and being enforced.

## MIRAFI®

Mirafi® Construction Products, a division of Ten Cate Nicolon and Dandy Products have developed the devices and technologies to support stormwater management and sediment control solutions. Dandy Products are available through Gamka Sales Company for keeping silt, sediment and construction debris out of storm sewers and waterways.

Gamka offers Dandy answers to site erosion and sediment control questions.

### Dandy Bag®

The patented Dandy Bag is designed for use with flat grates (including round) and mountable curbs to filter sediment-laden storm water.

The Dandy Sack is an open-top bag that is designed to hang beneath a storm grate to filter water. The suspended solids are allowed to settle out of the slowed flow and are captured prior to entering the inlet.

### Dandy Sack®

(AKA Dandy Bag II®)

### Dandy Beaver Dam®

(AKA Dandy Curb Bag®)

The patented Dandy Beaver Dam is designed for use with curb and gutter inlets to filter sediment-laden storm water.

The suspended solids are allowed to settle out of the slowed flow and are captured prior to entering the inlet.

### Dandy True Dam®

(AKA Dandy Curb®)

The patented Dandy True Dam is designed for use with curb and median inlets without grates to filter sediment-laden storm water. The suspended solids are allowed to settle out of the slowed flow and are captured.

### Dandy Pop™

The patented Dandy Pop is designed for use with flat field grates to filter sediment-laden storm water. No more cumbersome silt fence or similar devices that either fall down or have infiltration points. The Dandy Pop fully encloses the grate, eliminating sediment infiltration.

The suspended solids are allowed to settle out of the slowed flow and are captured by the Dandy Pop prior to entering the inlet.

*Dandy Products are proudly distributed by...*
